PREFACE

With the establishment of the new Division of Evaluation and Research, the statistical database is growing. The Department of Education Directory has, in the past, provided limited statistical information. In future, statistical information will be excluded from the Directory. The Directory will continue to list names and addresses of personnel in the school system in the province. The Annual Report describes the educational structure and initiatives of the department. However, the new report, "Education Statistics", has been developed which contains the most frequently requested information.

As this is the first statistical report in some years, any comments on its format and contents, and suggestions for additional information, are sought.
